Trailer in Foldaway Position 30Kgs

9.8Kgs

9.8Kgs

2.5Kgs

1 Carton 11Kgs

The Fold-A-Way trailer intended design is to be transported folded up in a caravan or vehicle, then at the final destination to assemble, fit the boat to the trailer then tow a short distance to the water. The trailer is not manufactured for long highway use or continuous towing over rough terrain.

PLEASE NOTE:

The Fold-A-Way trailer has been designed with no springing to achieve a portable trailer for easy use. Common sense must be prevail in regards to towing speeds on highways and particular unmade roads.

BOAT TRAILER ROLLERS

Dunbier would have one of the largest stocks and range of rubber and poly boat trailer rollers in their warehouses throughout Australia and competitive priced. Not only that, but we have a full range of shafts conveniently listed, along side the corresponding roller part number. All of the rollers displayed have a standard shaft size that will interchange with the most popular brands of boat trailers on the market today

FREQUENTLY ASKED HYDRASTAR BRAKING SYSTEM QUESTIONS ?

Q.. *How long has the HydraStar been on the market?*

A.. The HydraStar has been on the market for over 12 years. The current models are seventh generation, released in January of 2007.

Q.. *My Carlisle HydraStar trailer brake actuator does not work?*

A.. First, confirm that the in-cab controller being used is approved on the Carlisle HydraStar Controllers list. Next, refer to the Troubleshooting Guide located in your service manual (also available on-line at www.carlislebrake.com). If the unit still does not work (or fails any troubleshooting test), please contact the dealer, distributor, or trailer OEM from which the product was purchased.

Q.. *Is it acceptable to wire the Carlisle HydraStar differently from the electrical schematic published in the Service Manual?*

A.. NO. Carlisle recommends connecting the HydraStar according to the electrical schematic located in your service manual. Failure to follow these guidelines will damage the HydraStar unit and void your warranty.

Q.. *Can I use other manufactures' breakaway systems with the Carlisle HydraStar?*

A.. YES. The only breakaway system tested not compatible with the Carlisle HydraStar is the Hoppy/Tap Model 200099 and 20400 breakaway kits. These kits can result in the trailer brakes dragging or not releasing at all. Revised 10/10/2007

TRAILER GREASE

LUBRIMATIC

Made in USA, this is a sophisticated lubricant developed for severe operating conditions caused by salt water. It processes outstanding water resistance and superior rust and corrosion preventive characteristics

1835

1832

1831

Part #	Description
# 1831	Lubrimatic grease in a tub 454 grams: High temperature wheel bearing grease for boat and all types of trailers.
# 1832	Lubrimatic grease cartridge 387 grams: High temperature wheel bearing grease for boat and all types of trailers.
# 1835	Lubrimatic Grease Gun, Three way loading and suits standard and international grease cartridge. Made in USA

TRAILER BRAKE EQUIPMENT

Hydrastar Electric Hydraulic Braking System, With 1200psi Stopping Power

1943

1944

Complete Kit # 1938

1939

1200 psi Hydrastar Actuator Offers

- Faster response for reduced stopping distance
- Draws power only when brakes are applied.
- Simplified wiring—only 4 wires

Compare these Hydrastar Advantage

- Works from in-car brake controller. Inexpensive to fit

Easy To Install

- Simply mount the Hydrastar unit to the trailer and attach the hydraulic line.
- Includes detailed instruction manual

TRAILER AXLES

When Selecting an axle for you trailer use the information below as a general guide only.
This information is based on a maximum axle length past the centre bolt of the trailer spring of 250mm. Past this point reduces the capacity of the axle.

Axle Size	Max Weight Capacity	Bearing Number
39mm Solid Round	900Kgs	LM67010 & LM67048 LM11910 & LM11949
40mm Solid Square	1000Kgs	LM67010 & LM67048 LM11910 & LM11949

Bearing Buddy The original ... and still the best

When backed into the water for launching, boat trailer wheel hubs, heated by travel, are suddenly cooled. Air inside the hubs contracts and a vacuum is created. Water and dirt are sucked into the hubs through the inner seals and corrosion sets in immediately. Bearing failure can be expected within two seasons in fresh water– one season in salt water. When properly installed and maintained, Bearing Buddy prevents wheel bearing failure.

Bulk #	Packaged #	Bearing Protectors
	# 1779	Bearing protector chrome plated steel, includes PVC covers.

READING A TYRE SIDEWALL

The side wall on a tyre is an owner's manual. On it are designations and classifications that identify everything from common dimensions to standard test identification numbers. Being able to read the sidewall will help you better understand the performance standards of each tyre and will provide you with a guide for selecting the right tyre for the right application.

There are approx 500 Powerwinch service parts, naturally we don't have enough space in this catalogue to show them all, what we have shown on this page are the parts that are ordered most frequently.

ELECTRIC WINCHES

Two main factors determine which trailer winch is best for you. Trailer winches are rated by the amount of weight of the boat, and also their pull rating or lift capacity.

1142

Model 315 Powerwinch Electric Cable Winch.

Designed for mid-size boats. Featuring smooth power-in/freewheel out action For fastest retrieval speeds.

- 12 volt power
- Power-in/Free Wheel-out
- Suggested Boat Length 14-17Ft
- Vertical Lift 750Kgs *(Not to be considered or used as a hoist)*

1144

Model 712 Powerwinch Electric Cable Winch.

Featuring smooth power-in/freewheel out action. You can use a pulley or block at the bow eye to double your pulling power. This slows retrieval speed 50%

- 12 volt power
- Power-in/Free Wheel-out
- Suggested Boat Length 17-20Ft
- Vertical Lift 1090Kgs :Double line 1954Kgs *(Not to be considered or used as a hoist)*

1148

Model RC 30 Remote Control Powerwinch.

Featuring smooth power-in/freewheel out action. You can use a pulley or block at the bow eye to double your pulling power. This slows retrieval speed 50%

- Features Wireless Remote operation, 12 volt power
- Convenient light enclosed in winch casing.
- Pulley Block for Double Line applications
- Suggested Boat Length 18-25Ft
- Vertical Lift 1818Kgs :Double line 3409Kgs *(Not to be considered or used as a hoist)*

1146

Model 912 Powerwinch Electric Cable Winch.

Featuring smooth power-in/freewheel out action. You can use a pulley or block at the bow eye to double your pulling power. This slows retrieval speed 50%

- Power-in/Free Wheel-out
- Suggested Boat Length 18-25Ft
- Vertical Lift 1818Kgs :Double line 3409Kgs *(Not to be considered or used as a hoist)*
- Pulley block for double line applications.

TRAILER OUTBOARD BRACKETS

Dunbier's range of trailer outboard motor brackets helps take the load off the outboard motor leg and the boats transom. Currently in our range we have designed trailer outboard motor brackets that suit just about every boat trailer rear cross member on the market today. Fitting is straight forward with no drilling or welding to damage the surface of your trailer. Fully adjustable in length with most models featuring a shock absorbing coil spring and rubber strap to secure the motor.
